

NOTICE OF DATA BREACH

Date: January 17th, 2022

Shinsho American Corporation and its subsidiaries (“Shinsho”) values your business and respects the privacy of your information. As a precautionary measure, we write to inform you about a data security incident that may involve your business information.

On January 3, 2022 two Shinsho servers were compromised by third parties and a ransomware application encrypted all data, taking the servers and some network drives offline. Shinsho is still in the process of determining all of the information that has been compromised; however, this information may include your business or commercially sensitive information.

We reported this attack to federal law enforcement on January 5, 2022 and will continue to work with federal authorities to ensure the incident is properly addressed. Further, we are conducting a thorough review of all potentially affected systems and records. We are working with a third party IT service provider to remove all traces of the ransomware, restore network connectivity, and restore the information (to the extent possible). We are also implementing additional security measures designed to prevent a recurrence of such an attack and to protect the privacy of Shinsho’s valued customers and business partners. We will notify you of any significant developments.

Shinsho values your privacy and deeply regrets that this incident occurred. For further information and assistance, please contact John Lee at jlee@shinsho.com.

Sincerely,

Shin Kiyoshiro
President
